Ashish Ranjan

Forward Deployed Engineer | Patna, India
ashishranjaniitp@gmail.com | linkedin.com/in/ashish-ranjan6 | github.com/ashish6123

Summary

Forward Deployed Engineer Intern at Infivector and CS undergraduate at IIT Patna (Jul 2027). Runs enterprise LLM-gateway pilots: acceptance testing, root-causing customer issues in Go source and shipping the fixes and runbooks.

Experience

Forward Deployed Engineer Intern – Infivector Jul 2026 – Present

AION, an enterprise LLM gateway in Go | Conduit, a Go multi-agent orchestration engine, CLI and desktop app

- Led AION Enterprise pilot acceptance testing; confirmed 5 defects in routing, licensing, budgets and audit ledger
- Reproduced customer failures on their platform from logs and transcripts; wrote onboarding and fix runbooks
- Root-caused, in Go source, a model-alias bug causing HTTP 400s and an IPC defect breaking all 6 agent adapters
- Unblocked customer installs: WSL2 activation fix, amd64/arm64 Docker images, CI freshness gate with rollback
- Ended client retry storms on exhausted budgets via typed errors, Retry-After and reset headers, fixed reservations
- Made multi-agent team runs work on Windows: sandbox-block loops, DACL checks, MSIX AppData and installer locks
- Wrote a 1,400-line PowerShell acceptance suite replaying 14 Windows release scenarios on local or Store builds
- Built a 146-task benchmark harness across 7 task families to evaluate KV-cache affinity and model-routing behaviour

Projects

Limbo – Agentic Payment Reconciliation GitHub | Live

Python, FastAPI, SQLAlchemy, PostgreSQL, Next.js, Claude API, Razorpay, Docker

- Agentic system reconciling gateway payments with merchant orders; classifies 6 mismatch states and recovers them
- Guardrails: idempotency keys, amount ceilings, capped retries, a circuit breaker and an append-only audit log
- 100% detection and diagnosis accuracy on a 500-transaction chaos eval with 0% false interventions

StadiumSentinel – Multi-Agent Crowd Safety Platform GitHub | Live

Python, FastAPI, Google ADK, Gemini, Vertex AI Search, Firestore, Cloud Run

- Built for the Google Cloud APL national finale: 4 specialist agents (crowd, weather, security, emergency) on ADK
- Vertex AI Search RAG for emergency SOPs, Firestore sessions, Cloud Run deployment with Cloud Build CI/CD

ListingReel – AI Real Estate Video SaaS GitHub | Live

Next.js, TypeScript, FastAPI, Supabase, Groq, ElevenLabs, FFmpeg, Razorpay

- Full-stack SaaS that turns property details and photos into AI-narrated vertical listing videos in under 3 minutes
- 15+ JWT-authenticated REST APIs; Razorpay subscriptions with HMAC verification, tiered quotas and rate limiting

Technical Skills

Languages: Go, Python, TypeScript, JavaScript, SQL, PowerShell, Bash
Deployment: Docker, Docker Compose, WSL2, Windows (MSIX, installers), Linux, GCP (Cloud Run, Cloud Build), AWS Bedrock, Vercel, Render
AI: LLM gateways and routing, Claude, Gemini, Google ADK, multi-agent systems, RAG
Backend: FastAPI, Node.js, REST APIs, OAuth 2.0/OIDC, PostgreSQL, Supabase
Practices: Root-cause analysis, acceptance and regression testing, customer onboarding, runbooks, CI/CD (GitHub Actions)

Education

Indian Institute of Technology (IIT) Patna Aug 2023 – Jul 2027

B.S. in Computer Science and Data Analytics | CPI: 8.88/10

Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning, Deep Learning, NLP

Achievements

- **Google Cloud Agentic Premier League 2026:** won the Patna city round among 3,000+ developers; national finalist (top 80) at Google Ananta, Bengaluru
- SPI above 9.0 for 3 consecutive semesters at IIT Patna
