Ashish Ranjan

AI Engineer | Forward Deployed Engineer | Patna, India
ashishranjan-ai.vercel.app | ashishranjaniitp@gmail.com | linkedin.com/in/ashish-ranjan6 | github.com/ashish6123

Summary

Final-year CS student at IIT Patna (CPI 8.88, graduating Jul 2027) and Forward Deployed Engineer intern at Infivector, working on an enterprise LLM gateway and a multi-agent engine. National finalist, Google Cloud Agentic Premier League.

Experience

Forward Deployed Engineer Intern – Infivector Jul 2026 – Present

AION, an enterprise LLM gateway in Go | Conduit, a Go multi-agent engine with a CLI and desktop app

- Led acceptance testing for the AION enterprise pilot and confirmed 5 defects in routing, licensing, budgets and the audit ledger before customer rollout
- Reproduced customer failures from their logs and transcripts on their platform; wrote onboarding and fix runbooks
- Root-caused a model-alias bug returning HTTP 400s and an IPC defect that broke all 6 agent adapters; fixed AWS Bedrock non-Claude replies decoding to empty content
- Built a 146-task benchmark harness across 7 task families to evaluate KV-cache affinity and model routing
- Made multi-agent team runs work on native Windows (21 of 23 failing engine tests fixed) and built requeue, reroute and cancel for stalled agent tasks
- Unblocked customer installs with a WSL2 activation fix and amd64/arm64 Docker images

Projects

StadiumSentinel – Multi-Agent Crowd Safety (national finalist) GitHub

Python, FastAPI, Google ADK, Gemini, Vertex AI Search, Firestore, Cloud Run

- 4 specialist agents (crowd, weather, security, emergency) on Google ADK; routes each query to one or more agents and fires cascade alerts from live gate and weather data
- Vertex AI Search retrieval over emergency SOPs, with Firestore session storage

Limbo – Payment Reconciliation with Guarded AI GitHub | Live

Python, FastAPI, PostgreSQL, Next.js, Claude API, Razorpay, Docker

- Matches payments to orders and recovers 6 mismatch states; Claude explains root causes with a deterministic fallback and can never move money
- Idempotency keys, amount ceilings, capped retries, a circuit breaker and an append-only audit log

Open Source

- **Kestra** (merged #21997): streamed large-file processing, 1,000,000 records under a 256 MB heap; merged a benchstat regression gate in blueprints #4831

Technical Skills

AI: LLM APIs (Claude, Gemini, Groq), agents (Google ADK), RAG, evaluation harnesses, PyTorch, scikit-learn
Languages: Go, Python, TypeScript, SQL
Backend and Infra: FastAPI, Node.js, PostgreSQL, Docker, GitHub Actions, GCP (Cloud Run), AWS Bedrock, WSL2

Education

Indian Institute of Technology (IIT) Patna Aug 2023 – Jul 2027

B.S. in Computer Science and Data Analytics | CPI: 8.88/10

Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning, Deep Learning, NLP

Achievements

- **Google Cloud Agentic Premier League 2026: National Finalist** – one of 80 selected from 3,000+ developers across 30+ cities; won the Patna city round; finale at Google Ananta, Bengaluru
- SPI above 9.0 for 3 consecutive semesters at IIT Patna
